

FMEA Management Showdown: Spreadsheets vs ReliaSoft Cloud

SPREADSHEETS

Manual entry, prone to formatting issues and errors

Difficult to manage large datasets

Decentralised; data silos across multiple files

Inconsistent use of terminology, risk criteria, and formats

Manual file sharing; version confusion

Manual consolidation and interpretation of data

Harder to ensure consistent formats and records

File-based access, limited control

Local files prone to loss or version issues

RELIASOFT CLOUD

Intuitive web-based interface with built-in FMEA workflows

Scales seamlessly across teams, systems, and projects

Centralised, structured database ensuring data consistency

Guided workflows help ensure consistent application of FMEA methodology

Multi-user access with real-time collaboration in a cloud environment

Dashboards and AI-driven insights at your fingertips

Supports alignment with industry standards such as AIAG-VDA & SAE J1739

Role-based access, cloud security, and user authentication

Cloud-based: secure access anytime, anywhere

Why teams are switching to ReliaSoft Cloud today:

- Data Integrity: Single source of truth for your FMEA
- Knowledge Reuse: Access past FMEAs and reference data to guide ongoing projects
- Process Consistency: Standardised workflows aligned to best practices
- Dynamic Dashboards and AI-Powered Brainstorming: Real-time risk tracking and smarter decision making
- Secure Deployment: Global collaboration through cloud-based access
